IN THE CLAIMS:

Please amend the claims as follows:

1. (currently amended) A method for managing document processing device job information comprising:

organizing said job information into menus and submenus; and

displaying said job information organized into said menus and submenus to a user.
2. (original) The method of claim 1, wherein said menus and said submenus comprise:

a main menu including main menu categories; and

a submenu under each of said main menu categories.
3. (original) The method of claim 2, further comprising:

navigating through said menus; and

displaying said submenus on a user interface when said menus are selected.
4. (previously presented) The method of claim 1, wherein said organizing said job information comprises organizing said job information according to processing date and time.
5. (currently amended) The method of claim 4, wherein jobs processed in a specified time frame are displayed on a user interface of [[said]] a document processing device.

6. (previously presented) The method of claim 1, further comprising customizing said menus and said submenus according to a user specification.

7. (original) The method of claim 6, wherein said customizing said menus and said submenus comprises establishing menu and submenu category names and content.

8. (original) The method of claim 7, wherein said menu and submenu content comprises job information identifying completed jobs, pending jobs, jobs currently being processed, a source of said job, a destination of said job, a type of file or a document, when said job was processed, the type of job processed by said document processing device, a number of pages in said job, or a size of said job.

9. (original) The method of claim 1, further comprising displaying said job information on a web page.

10. (currently amended) The method of claim 9, further comprising providing said web page with an embedded web server associated with [[said]] a document processing device.

11. (original) The method of claim 9, further comprising viewing said web page with a web browser.

12. (original) The method of claim 1, further comprising displaying said job information on a user interface.

10/715,951

13. (original) The method of claim 12, wherein said user interface organizes said job information into said menus and submenus.

14. (original) The method of claim 13, wherein said user interface is configured to display job information regarding jobs that have already been processed.

15. (original) The method of claim 13, wherein said user interface is configured to display job information regarding jobs that are currently being processed.

16. (original) The method of claim 13, wherein said user interface is configured to display job information regarding jobs in a queue waiting to be processed.

17. (original) The method of claim 16, further comprising processing said jobs in said queue according to a precedence.

18. (original) The method of claim 16, further comprising processing said jobs in said queue according to a set of priority regulations.

19. (original) The method of claim 18, wherein said priority regulations are specified by a user.

20. (original) The method of claim 13, wherein said user interface is configured to display a plurality of submenus for each of said main menu categories.

200308942-1

10/715,951

21. (original) The method of claim 20, wherein one of said plurality of submenus comprises job information on jobs currently being processed.

22. (original) The method of claim 20, wherein one of said plurality of submenus comprises job information on jobs in a queue, waiting to be processed.

23. (original) The method of claim 20, wherein one of said plurality of submenus comprises job information on jobs already processed.

24. (original) The method of claim 1, further comprising storing said job information in a memory.

25. (original) The method of claim 24, further comprising storing jobs processed in a memory.

26. (original) The method of claim 1, further comprising requiring an authentication to access a restricted menu or submenu.

27. (original) The method of claim 26, wherein said authentication comprises a login password.

28. (currently amended) A document processing device comprising:
a printer for producing hardcopy documents;

200308942-1

a document processing device memory ~~configured to store an embedded web server;~~
and

a user interface disposed on said document processing device;

wherein said user interface is configured to select and view job information for said document processing device that is organized into and displayed in menus and submenus.

29-31. (cancelled)

32. (original) The document processing device of claim 28, wherein said user interface comprises a navigation device.

33. (original) The document processing device of claim 32, wherein said navigation device comprises one of directional buttons, numbered buttons, a keyboard, a keypad, a mouse, or a touch screen.

34. (currently amended) The document processing device of claim 28, wherein said device is configured to be communicatively coupled to a user terminal.

35. (currently amended) The document processing device of claim 34, wherein said document processing device further comprises an embedded web server ~~user terminal~~ comprises one of a personal computer, a laptop, a personal digital assistant, a cell phone, or a server.

10/715,951

36. (currently amended) The document processing device of ~~claim 34~~ claim 35, wherein said user terminal further comprises a web browser; and said document processing device is configured to provide said job information for said document processing device that is organized into and displayed in menus and submenus to said web browser using said embedded web server.

37. (original) The document processing device of claim 34, wherein said device is communicatively coupled to said user terminal through a network.

38. (original) A document processing device comprising:
receiving means for receiving job requests; and
display means for displaying job request information in menus and submenus.

39. (original) The document processing device of claim 38, wherein said display means comprises a user interface.

40. (original) The document processing device of claim 38, wherein said display means comprises a web page.

41. (original) The document processing device of claim 38, further comprising customizing means for customizing said menus and said submenus.

42. (original) The document processing device of claim 38, further comprising recording means for recording said job information.

200308942-1

10/715,951

43. (original) The document processing device of claim 42, wherein said recording means comprises a memory of said documents processing device.

44. (original) A processor readable medium having instructions thereon for:
storing job information in document processing device memory;
organizing said job information into menus and submenus; and
displaying said menus and submenus on a user interface or web page.

45. (original) The processor readable medium of claim 44, wherein said processor readable medium is associated with a document processing device.

46. (original) The processor readable medium of claim 44, wherein said processor readable medium is associated with a remote server.

47. (new) The method of claim 1, wherein said job information is print job information and said method comprises:
organizing said print job information into menus and submenus; and
displaying said print job information organized into said menus and submenus to a user.
